WORK EXPERIENCE

Software Engineer - Chalhoub Group

Oct 2021 - May 2026

- Spearheading development on internal Learning Management System (LMS), using PHP, JavaScript, SQL, Python, HTML, and CSS
- Elevating user engagement by implementing new features for more dynamic and intuitive user experience
- Streamlining administrative workflows by creating LMS-based tools that significantly reduce friction, improving the speed and accuracy of content and user management, decreasing times of certain processes by up to 90%
- Leveraging SQL, Excel, and Power Automate to create comprehensive reports to support strategic decision making
- Coordinating high-value projects between various internal teams and external vendors to ensure smooth development cycles and launches

Unity Developer - Shamsi Game Studio

Aug 2021 - Oct 2021

- Developed an Arabic Scrabble game for mobile, built in Unity Engine
- Optimized performance for a critical word suggestion algorithm by 95%, that previously caused 2-4 seconds of latency, by strategically pruning and sorting a large input list
- Designed and implemented a modular opponent AI, with customizable behaviors that scaled in difficulty

Unity Developer - PepUp Studios / Maple InfoSystems

Apr 2021 - July 2021

- Developed the core character controller for a new 3D third-person shooter by creating a responsive movement system using a virtual analog stick
- Created an intuitive swipe-based camera control system, and automatic rotation to target enemies
- Drove a major update for an existing hyper-casual traffic signal game by creating scalable vehicle variants using ScriptableObjects
- Developed a robust power-up system for the aforementioned game to improve player engagement
- Improved AI vehicles' navigation system by using waypoints to create more natural NPC behavior

Training Centre Coordinator - Mercedes-Benz Cars Middle East

Apr 2019 - May 2020

- Key focus on reporting using Excel and VBA, data entry, video and image editing
- Facilitated regional alignment across 10+ international markets for seamless operation of training programmes

IT intern in Leisure & Entertainment - Majid Al Futtaim

June 2017 - Mar 2018

- Full-stack development of a suite of minigames using WebGL in Unity for Majid Al Futtaim's website which allowed users to play games to earn points to use in Magic Planet arcade
- Implemented physics for minigames such as skeeball, skeet shooting and roulette using PhysX
- Integrated database functionality to manage player data, enabling persistence of points earned

ACADEMIC PROJECTS

- **Heriot-Watt University (2023):** Virtual reality app for Oculus Rift to measure and study social anxiety
- **University of Wollongong, Dubai (2019):** Research assistant for an AR application using NFC tags
- **University of Wollongong, Dubai (2018):** Capstone project, VR app for Samsung mobile to treat phobias

TECHNICAL SKILLS

- **Languages:** C#, C++, PHP, JavaScript, SQL, Python, HTML, CSS
- **Engines & Programmes:** Unity, Unreal Engine, Autodesk Maya, Moodle
- **Development tools:** Github, Gitlab, Postman

EDUCATION

Master of Science in Software Engineering with Distinction

Aug 2021 - Dec 2023

Heriot-Watt University, Dubai

Bachelor of Computer Science (Multimedia & Game Development) with Distinction

Jun 2015 - Jan 2019

University of Wollongong, Dubai
